International**

PROSPECTUS 2024

CSI- For Children, By Parents

A passionate group of parents dedicated to transforming education in Pakistan by launching a Nationwide School Network focused on making a difference in the educational landscape of Pakistan at the individual, collective, and universal levels.

The CSI Promise

Central School International (csi)

takes flight on the wings of the belief that true education shapes a child's outlook to be positive and hopeful, their character to be noble, their actions to be meaningful, and their values to be built on firm foundations while ensuring that their cognitive and academic development takes place in the best possible manner. True education, for a child, is the growth of their entire being. We recognize the unique spark in every child and aim to nurture it through a curriculum that is aligned with global academic standards while being culturally rooted. This commitment to holistic learning ensures that every child is ready to take flight. Our curriculum, learning spaces, teacher training processes, and facilities such as day boarding and transport are all designed keeping in view the nurturing goals of parents for their children.

OUR GUIDING PRINCIPLES

Knowledge

Exploring the infinite potential of the human mind and spirit: utilizing one's intellectual and cognitive abilities such as one's capacity for learning, reasoning, problem-solving, and creativity while continuing to remain human, and also exhibiting the limitless potential for growth, love, compassion, and resilience.

Action

Take meaningful actions in the pursuit of one's goals: demonstrating intentionality and responsibility of actions and choices to shape one's self and the world in a positive and purposeful manner.

Resolve

Fostering nobility, strength of character and a sense of grounding: exhibiting mental fortitude and resilience that empowers one to achieve one's goals and face challenges, while acting with integrity, compassion and a sense of justice.

From the Desk of the Principal

It is my honor and privilege as the Principal of the first campus of Central School International (CSI) to welcome you to our school. As an educator with over 25 years of experience in leading primary and secondary schools offering international curricula, I strongly believe that every child has the potential to learn and a right to enjoy learning. With a safe, supportive, and happy school environment at CSI, my team and I are creating the conditions for meaningful learning for each child, each day.

At CSI, every child's everyday matters. The school day starts with your child being greeted every morning at the school gate by me and my team. Students spend their extended school day under our care and supervision, enjoying opportunities for interaction and learning, within and beyond classrooms. Cafeteria time, snack breaks, sports, and club hours are some of the many ways the CSI community connects and learns with and from each other.

Through play, inquiry and technology, we tap into children's natural curiosity, talent and ability to shape academic learning. Learning spaces and school days are curated to encourage our students to explore, evaluate, express, and ENJOY learning.

"It takes a village to raise a child" according to an African Proverb. We at CSI believe in building a school community where the school, parents, and the larger community take an active and responsible role in contributing towards the education of our students. I invite the parent community to join me and the team at CSI in creating and celebrating the lifelong learning journey of our students. Let's work together to help our children develop as proud Pakistanis, who value their responsibility as global citizens of the future.

The CSI Advantage

Beyond the classroom, where experience educates!

Our Academic Programs

CSI's curriculum is culturally driven and globally aligned. It develops competencies i.e. **the CSI Character Traits** and 21st Century skills - **Communication, Collaboration, Critical thinking, Creativity, and Citizenship.**

Robins

Early Years

(Pre-Nursery, Nursery, Kindergarten)

Our Early Years Curriculum, developed in collaboration with Trehaus Singapore, is designed to keep our young Robins actively engaged in the learning process. It is made to carefully develop learning skills while ensuring that it nurtures all aspects of a child's growth during their early years through a research-based curriculum. Our play-based approach provides a perfect setting for our young students, and emphasizes the development of the foundational skills of literacy and numeracy.

Sparrows

Primary

(Class 1 to 5)

Our Primary Program which is rooted in local learning, draws from the Cambridge Primary Curriculum and builds upon the

Early Years Curriculum. It encourages creative expression, critical thinking and the development of language and mathematical skills through conceptual inquiry-based learning.

Larks

Middle School

(Class 6 - 8)

Our Middle Years Curriculum brings together academic rigor and opportunities for personal growth. It equips our students with the knowledge, skills and values they need to thrive in the world, making them future-ready global citizens.

Eagles

IGCSE & A level

Cambridge International IGCSE and A levels are among the most well-recognized qualifications that offer a flexible curriculum with a diverse range of subjects leading into multiple academic pathways and careers. Our Eagles program is the embodiment of our students reaching greater heights in their academic and personal development while also demonstrating qualities of character and leadership cultivated by our extended learning design.

Extended Learning Program

As a day boarding school, our Extended Learning Program offers a variety of co-curricular clubs and sports clubs that are offered from class 1 onwards and are scheduled within the school timetable as part of the curriculum.

At CSI, a range of co-curricular club activities cater to Science/ Technology, Performing and Visual Arts, Language, Media & Communication and Life Skills. In our sports clubs, we focus on both traditional and international games to develop skills and nurture a deep appreciation of diverse sporting experiences.

Each child gets to experience one co-curricular club and one sports club each term. Each year the student is assigned a new club so that they experience a varied range of knowledge and competencies. Our Extended Learning Program aims at;

Empowering Students

We nurture talents and interests, extend learning through real-life experiences, and celebrate achievements in co-curricular activities and sports.

Holistic Development

We develop comprehensive knowledge, practical skills, and positive attitudes across disciplines, preparing students for diverse academic and career paths while fostering community engagement and service learning.

Global Citizenship

We build global citizens by promoting local culture appreciation, participating in national and international events and establishing global connections.

Globally Aligned,
Locally Grounded

After School Program

For parents of our Early Year Robins, who may wish to pick their child from school at a later time, CSI offers an after-school program. The students will be able to stay in school till 3:00 pm during which they will have scheduled nap times, and playful activities designed to keep them comfortable and happily engaged.

CSI Talent - Investing in Quality Teaching

Our teachers are recruited through a rigorous selection process overseen by our Learning and Development Center that evaluates not only their expertise, but also their attitudes and motivations to ensure that they become trusted role models for our students. They will then be enrolled in a Chartered Teacher Program, the first ever in Pakistan. At the same time, all of our Early Years teachers are required to complete a comprehensive training program offered by our Singaporean partners.

Our Dynamic Learning Spaces

Our purpose-built campus has indoor and outdoor learning spaces which are aesthetically & mindfully designed to give students access to safe, spacious & well-lit learning areas that encourage curiosity, play & interaction.

An **Innovation Lab** fully equipped with the tools and resources to provide hands-on learning experiences. It includes a Virtual Reality Station, a Robotics space, and a Media station to nurture curiosity, creativity and critical thinking through technology.

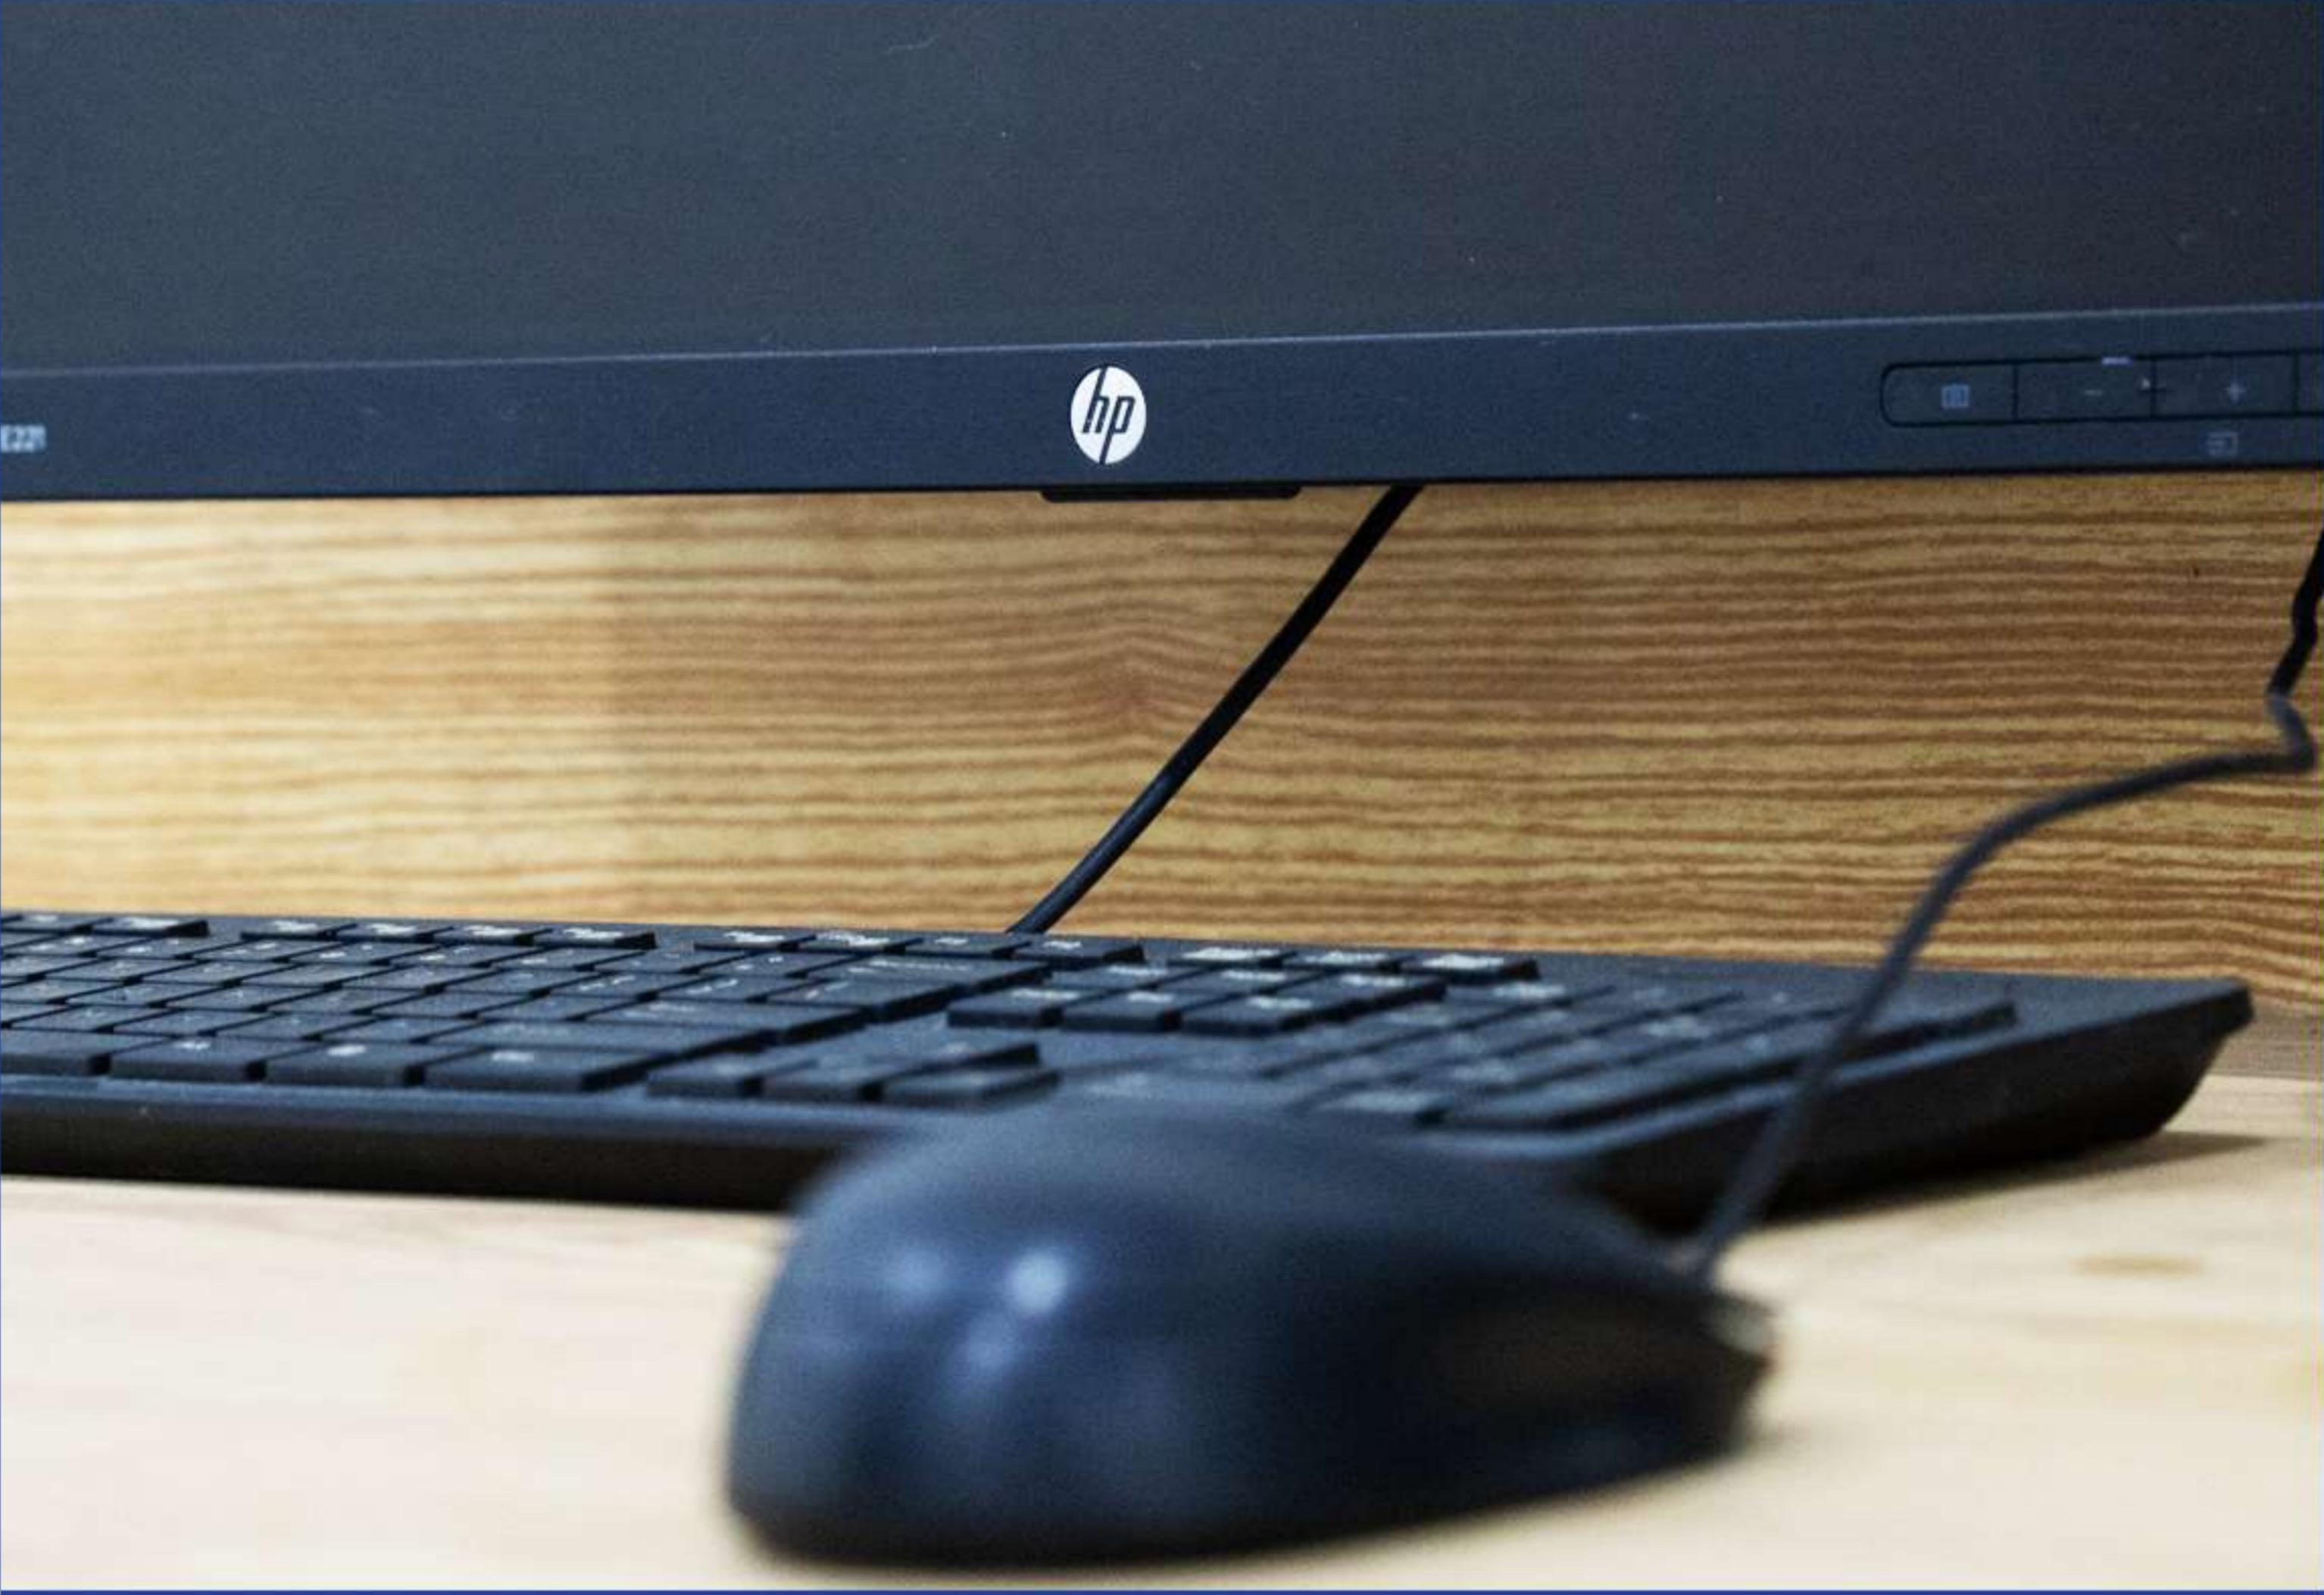

The **Exploratorium** is an inquiry lab, a space for our little scientists to ignite their curiosity in the natural sciences, earth sciences, & space science. Exhibits, models, microscopes, telescopes, and light boxes are some of the many resources that will encourage them to ask questions, experiment & make connections with the world around them.

The **Meditation Room**, with its soft lighting, soothing colors, calming music and natural elements is designed to cultivate peace, focus and well-being.

The **Learning Resource Hub** or school library is an inviting space stocked with books and various other resources, flexible seating and creatively designed areas with an open lobby to transport our students to a world of imagination and discovery.

Our **ICT Lab** is designed for students to experience the exciting world of technology to develop digital literacy, explore creative possibilities, and learn to use technology responsibly.

Serving Nutritious Meals to Our Students

Nutrition is a critically important and often an under-discussed part of a child's education. CSI has a purpose-built in-house kitchen where hygienic and freshly cooked hot meals are served to meet the daily nutritional needs of our students.

Safe Transport System

We offer state-of-the-art transport facilities for our students. Our technology-enabled service allows parents to utilize a user-friendly app to monitor their children's journey. We also have dedicated female custodian staff for the vans, to ensure another set of eyes for the safety of our students.
